

AT35 / AT37 GX 460

Sought after for its simplicity, off-road credentials, and luxury, the Lexus GX 460 strikes the perfect balance as a dependable and comfortable overlanding vehicle. Arctic Trucks is raising the bar in North America with AT35 & AT37 conversions for the 2010-2023 Lexus GX 460, building on our years of experience upfitting the Toyota LC 150 platform in Europe.

**ESTIMATED CONVERSION COST
STARTING AT: \$19,749**

Rather than lifting the vehicle to accommodate larger tires, our Icelandic-rooted design ethos incorporates extensive re-engineering of the body and frame combined with precise wheelbase and track width adjustments to accommodate up to 37" tires with a mere 1.5" suspension lift. Our ultra-low center of mass design retains near-stock suspension geometry, resulting in confidence inspiring handling on and off-road, improved comfort, and reduced maintenance compared to typical modifications to fit larger tires. Arctic Trucks' signature full-coverage fender flares amplify the profile of the GX 460 with authentic Icelandic style and protection.

Each AT35 & AT37 conversion is constructed by qualified Arctic Trucks Authorized Upfitters throughout North America, embracing Arctic Trucks 30+ years of experience designing vehicles to operate in the harshest environments on earth. Authenticated with a serialized build plaque and backed by a 2-year/24,000 mile warranty, you'll confidently embark on adventures far and wide knowing your vehicle is bred from Arctic Trucks' unparalleled expedition experience. Ready to Explore Without Limits?
